

Tennessee Crop Weather

Tennessee Field Office • PO Box 41505 • Nashville, TN 37204 • (615) 781-5300 or (615) 891-0903 • www.nass.usda.gov

Issued Monday 3:00 PM; July 23, 2018

For the Week Ending July 22, 2018

STATES CROPS IN MOSTLY GOOD CONDITION

The State's crops are in mostly good condition though rains have been spotty even within counties, causing top and sub-soil moistures to start decreasing. The tremendous amount of rain earlier in the season has helped with current soil moisture levels. Some tobacco is starting to be cut and pastures are in mostly good condition.

There were 5.4 days suitable for field work. Topsoil was 5 percent very short, 21 percent short, and 69 percent adequate, and 5 percent surplus. Subsoil moisture was 5 percent very short, 20 percent short, 73 percent adequate, and 2 percent surplus.

[illegible]

County Agent Comments

The farmers in Fayette County are spraying pests when they can. It has rained about every day this week in different parts of the county. Crops look good.

Jeff Via, Fayette County

It's a "Tale of Two Cities", the Haves and the Have Nots! Parts of the county can't miss a rain, and other parts can't buy a rain. Corn yields are being shaved off every day where it is dry with mid to upper 90 degree weather is cooking the corn. Soybeans are beginning to show signs of moisture stress. Crops look very good where rain is falling or irrigation rigs are running. Forage harvest continues.

Jeff Lannom, Weakley County

Some farmers started cutting tobacco. **Jeff Smith, Robertson County**

Giles County received another 1.5 to 2 inches of rain this week. Pastures and crops looking very good for this time of the year.

Kevin Rose, Giles County

Another wet week. No heavy rain but enough to keep farmers out of the field.

Larry Moorehead, Moore County

1/4 inch rain this week. Corn and beans look great. Johnson grass is ready to be cut again for hay.
John Goddard, Loudon County

Recent rain has improved soil moisture. **Chris Ramsey, Sullivan County**

Much needed rain this week! **James Blake Ramsey**

For the last week, rainfall predictions have bypassed Davidson County, resulting in depleted topsoil and subsoil moisture levels,

David Cook, Davidson County

Most of our soybeans are blooming and some have started setting pods while the majority of corn seems to be around the R1-R2 stage. Moisture has not been lacking and consequently has been thought of as a double-edged sword; keeping machinery out of the field, but allowing unimpeded crop growth. Hay bales and pasture grasses are in good shape and abundant supply.

Matthew Deist, Marion County
